INORU AKHMAD

FULL STACK WEB DEVELOPER

Surabaya, Indonesia | +62 899-4580-104 | inoru375@gmail.com

LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Full Stack Web Developer with a Software Engineering background and currently pursuing a Bachelor's degree in Information Systems. Experienced in building REST APIs, backend architecture, and modern responsive web interfaces using React, Next.js, Laravel, Node.js, and PostgreSQL. Focused on efficient APIs, secure authentication, automated testing (Jest, Vitest, Playwright), SonarQube Quality Gate compliance, multi-layer security audits (SAST, Nmap, Katana, Nuclei), Core Web Vitals, and database query optimization.

PROFESSIONAL EXPERIENCE

Sobat UMKM Pro — Sidoarjo | **IT Operational (Intern)** | August 2026 – Present

- Develop UI/UX and backend for ProMaP (Project Management Platform) using Next.js 14/15 (App Router), Tailwind CSS, shadcn/ui, Prisma ORM, and PostgreSQL (Neon), deployed in production on Hostinger VPS with Nginx reverse proxy.
- Design and implement REST APIs with JWT authentication, 4-level RBAC (Super Admin, Operational Admin, Manager, PIC), and multi-tenant data isolation per company.
- Optimize application performance and database queries using Server Components, precise Prisma selects, caching (unstable_cache + revalidateTag), dynamic imports, and Suspense to reduce First Load JS and prevent N+1 queries.
- Build Randumart e-commerce business features including automatic rating and reviewCount increments after PAID orders, automatic stock decrement, and dynamic promotional banners with countdown timers.
- Implement an order state machine (PENDING → MENUNGGU_BAYAR → PAID → PROCESSING → SHIPPED → COMPLETED) with flexible transition validation.
- Integrate the frontend with REST APIs using Axios and NextAuth (Google SSO + Credentials), while implementing on-page SEO and Core Web Vitals improvements.
- Conduct Static Application Security Testing (SAST) using SonarQube and Jest/Vitest unit testing framework generating LCOV coverage reports, resolving accessibility (S1082) and sorting issues (S2871), boosting coverage from 9.6% to 58.4% with 0 security/reliability issues, 190/190 business tests passed (100%), and achieving Quality Gate PASSED status.
- Perform vulnerability assessments (npm audit) to mitigate 16 package vulnerabilities (ranging from Moderate to Critical/RCE) across dependencies, remediating body-parser DoS (CVE-2026-111181), zod memory exhaustion (CVE-2023-54404), and fast-uri spoofing (CVE-2026-110306) to achieve 0 vulnerabilities, implementing strict TLS/SSL database connection rules and host whitelisting to prevent SSRF.
- Execute Automated E2E Testing using Playwright across 13 core application modules—including authentication, RBAC management, Kanban board, Gantt chart calendar, and analytics dashboards—achieving a 100% test pass rate.
- Conduct Penetration & Network Security Testing using Nmap (verifying open web ports 80/443 under Nginx while database ports 3306/5432, SSH 22, and Redis 6379 are filtered), Katana Engine (mapping 35 routes/endpoints and validating middleware session redirects), Nuclei Scanner (evaluating ModSecurity WAF & hCDN resilience), and DevTools audit (enforcing HSTS, X-Frame-Options: SAMEORIGIN, nosniff, and API rate limiting).

CV. Arfa Nusantara Teknologi — Surabaya | **Web Developer (Intern)** | October 2022 – March 2023

- Developed an employee attendance status website using Vue.js, Tailwind CSS, Laravel, and REST APIs.
- Built, maintained, and integrated REST APIs for internal attendance data management functionality.
- Optimized backend and interface performance through query optimization and caching, while ensuring responsive behavior across mobile, tablet, and desktop devices.
- Collaborated across teams and used Git and GitHub for version control.

PROJECTS

ProMaP — Project Management Platform (2026)

Multi-tenant SaaS application with REST API, JWT authentication, 4-level RBAC, modern UI, analytics dashboard, and Kanban board.

Tech Stack: Next.js 15, Tailwind CSS, shadcn/ui, Recharts, Prisma ORM, PostgreSQL (Neon), NextAuth, SonarQube, Playwright, Nginx.

Link: https://promapv2.sobatumkmpro.com/

Randumart — Full Stack E-Commerce (2026)

E-commerce website featuring an order state machine, automatic stock management, dynamic promotional banners, responsive UI, and checkout flow.

Tech Stack: Next.js, Tailwind CSS, shadcn/ui, Axios, Prisma ORM, PostgreSQL (Neon), NextAuth.

Link: https://www.randumart.shop/

EDUCATION

Universitas Terbuka — Information Systems (Semester 3) | 2025 – Present

SMK Negeri 1 Surabaya — Software Engineering | 2021 – 2024

TECHNICAL SKILLS

Frontend: React, Next.js, Vue.js, Tailwind CSS, shadcn/ui, Axios, HTML5, CSS3, TypeScript

Backend: Node.js, Express.js, Laravel, REST API, JWT Authentication, NextAuth, API Rate Limiting

Database: PostgreSQL, MySQL, Prisma ORM, Neon

DevOps & Tools: Git, GitHub, GitHub Actions (CI/CD), Docker, Ubuntu, Nginx, Vercel, Figma, Swagger, Postman, Prisma Studio, VS Code

Unit Testing: SonarQube, Playwright, Vitest, Jest, Apache Jmeter

Security Testing: Npm Audit, Nuclei Scanner, Nmap Scanner, Katana Engine, DevTools

Soft Skills: Communication, Problem Solving, Adaptability, Collaboration, Time Management
